Evidence → Impact

Our University of Stirling research emphasized:

- The importance and increased need for partnership working between housing, health and social care
- The need for more strategic planning for future demographic change
- Housing planning and support is an underexplored yet key priority, especially in the preventative agenda
- We need a lifecourse approach to future-proofing in the UK

Housing and Ageing:
Linking strategy to future
delivery for Scotland,
Wales and England 2030

What we did

Hopetown is run as a bespoke, personalised, strategic exercise – that allows negotiation of potential obstacles for delivering strategies that support independence.

We bring together the right people into the room to enable future planning of housing, health, and social care

Hopetown in action

Change peoples' perspectives, drawing them into roles that challenge assumptions

FOI why spot was
as survey - what was
Scary & £

How was survey, paid
for in last 5 yrs
